

Synergy Practice Solutions prides itself on offering personalized billing services to its clients.

In a world where everything is emailed or faxed we prefer to talk with you one on one in order to better serve your individual needs.

.....

We have a knowledgeable billing staff that can help you put together the confusing pieces of today's billing world. Our staff is detail oriented and work tenaciously at getting your claims paid.

Synergy Practice Solutions can increase your cash flow, reduce your office distractions, and allow you to focus on patient care.

Synergy Practice Solution's Mission

At Synergy our mission is to provide physicians and other health care professionals a broad range of services to improve the quality of care. Our purpose is to aid in the building of successful medical practices through improving efficiency and productive operations, while complying with regulatory agencies.

In an effort to meet this mission, Synergy created a development team of physicians, coding specialists, and practice managers to tackle the issues facing physicians today. This team of experts work to help physicians build successful practices by addressing issues like Compliance, Efficiency, Productivity, Billing and Human Resources. Our dedication and commitment to excellence is the foundation of our success.

Important questions

What is my net collections ratio?

If you are unsure, or if it is below 90%, you may want to evaluate your existing method of medical billing to determine if it is really effective. Practices that are processing their medical billing internally often find that their office staff does not have the time to dedicate to resolving insurance denials, and making collection calls. **Synergy has an average net collections ratio of between 97% and 100%.**

How much am I spending on my Billing Staff?

One Billing Specialist costs approximately \$23,000 to \$40,000 per year plus benefits. Don't forget employee turnover!

How much am I spending on Billing Costs?

The average cost to file a claim is between \$7 and \$12 dollars each. **If you see 100 patients per week your cost can be between \$36,400 and \$62,400 per year.** You also must factor in the overhead costs such as computers, software, office supplies, office space, and utilities to house your billing staff.

Would I like to have more time for my patients and less office distractions?

By using Synergy Practice Solutions you and your staff will be able to focus on the patients without the many distractions caused by having your billing in house.
